Verbal Description

Charred censer prong. No decorations visible, but some striations along prong. One very nicely finished round vent hole of 0.9cm diam located in upper half of prong. Prong diam = 3.0 - 3.5cm. Prong badly burnt at tip and on both edges of prong, though whole item is ~~badly~~ blackened heavily. Also extremely charred on both sides of plate through the palo completely. Least burnt is immediately around vent hole & from vent hole down to plate, though even this section is dark.
